Om Lahore

Frontend Engineer

Mumbai, India | +91 91568 02668 | omlahorey@gmail.com | github.com/omlahore | linkedin.com/in/om-lahorey

Open to on-site or hybrid roles in Pune, Mumbai and Bengaluru, and remote.

Technical Skills

Frontend: React (React.js), Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, SwiftUI, HTML, CSS, responsive design, accessibility
Graphics: Three.js, WebGL, canvas rendering
Testing: Jest, React Testing Library, Vitest, unit and integration testing
Backend: Node.js, Express, REST APIs, GraphQL, PostgreSQL, MongoDB
Build and delivery: Vite, Webpack, GitHub Actions, Continuous Integration and Continuous Deployment (CI/CD), Docker
Performance and practices: page load optimisation, Amazon Web Services (AWS) hosting, Git, code review, Figma handoff

Experience

Founding Engineer June 2026 - Present
Ensueno *Mumbai, India*

- Build the front end for a BFSI education platform in React, including a voice interface over retrieval-augmented AI services.
- Own features end to end as the founding engineer, across all 3 layers: the React interface, the Node.js application programming interface (API), and the data behind it.

Web Developer April 2024 - June 2026
Marketing Mojito *Remote*

- Delivered 20 or more client sites in JavaScript and React, and cut median page load time by roughly 20 percent.
- Built Docker-based Continuous Integration and Continuous Deployment (CI/CD) pipelines on GitHub Actions so all 20 or more sites deployed on merge.
- Owned Amazon Web Services (AWS) hosting across 20 or more client properties: Simple Storage Service (S3), Domain Name System (DNS) records and Transport Layer Security (TLS) certificates.
- First responder for production incidents including site compromises: contained and recovered the affected sites and wrote the postmortems.

Projects

RemoveMacAI | *Swift, SwiftUI, Objective-C, macOS*

- Built an open-source macOS debloater, a native SwiftUI app plus a command-line tool, that turns off Apple Intelligence, deletes its on-device models through Apple's asset service over XPC, and applies 40 reversible privacy and system tweaks, locking the managed ones in a configuration profile with System Integrity Protection left on.
- Reached #1 on Hacker News with 4,800+ GitHub stars and 57,000+ downloads, was covered by The Verge, Ars Technica, The Register, MacRumors and AppleInsider, and ships through Homebrew with attested GitHub Actions releases (github.com/omlahore/RemoveMacAI).

Open Source Contributions

61 merged pull requests across 24 open-source repositories, including four Cloud Native Computing Foundation (CNCF) projects (Kyverno, Volcano, OpenKruise and zot), Grafana and Google's Kubernetes History Inspector. All publicly verifiable.

- OneBusAway Wayfinder, a SvelteKit transit web app (github.com/OneBusAway/wayfinder, 7 merged): stopped outside-click dismissal from stealing keyboard focus, returned 400 for malformed analytics events, fixed a longitude span sent under the wrong parameter, and added unit tests.
- Grafana (github.com/grafana/grafana, 2 merged): fixed sparklines drawing flat for values below 1e-6, where the range minimum and maximum collapsed to the same float, and bounded the decimal count passed to toFixed in number formatting.
- Browserbase Stagehand (github.com/browserbase/stagehand/pull/642): replaced a silent no-op with a startup error when the BROWSERBASE flag was set without an application programming interface (API) key.
- Phase (github.com/phasehq/console/pull/972): fixed service-token expiry stored as server local time rather than Coordinated Universal Time (UTC), which shifted every token lifetime by the host offset.
- Mozilla MDN (github.com/mdn/content/pull/38998): removed an incorrect IndexedDB reference from the openCursor documentation.

Education

Vishwakarma Institute of Technology (VIT) Pune, India
Bachelor of Technology (B.Tech), Computer Science, CGPA 8.8/10 *November 2022 - June 2026*

Certifications: AWS Cloud Essentials, IBM DevOps, Cisco CCNA and Cybersecurity Essentials, Harvard CS50P.
